

Mining, Minerals & Resources

End-to-end Solutions Built From
Innovation & Delivered With Safety

Swire Shipping has an extensive history delivering heavy equipment, vehicles, drills, and bulk minerals to mining and resource extraction projects around the globe.

We understand the critical nature of your shipments and work closely with you to provide end-to-end solutions that maximize safety, respond to industry demands and deliver your cargo on-time, every time.

From lifting excavators to transporting bulk shipments of nickel—we're here to deliver logistics that offer the safety and security your projects require.

Early Engagement Services:

Advanced planning through route and feasibility studies.

Sustainable Shipping Via Direct Port Calls:

Meeting your environmental targets through emissions reductions.

Transport Engineering Services:

Dedicated analysis and support across your entire transportation network from stowage plans to method statements.

Civil Works Involvement:

Providing full-spectrum support from the moment you start conceptualizing your cargo delivery.

Innovative Lifting Solutions:

From crushing equipment to conveyors, we have the capability and capacity to handle your cargo with care.
